

For teachers

How to set up a project in The Real Deal – step by step

The Real Deal part of the Teacher's sections gives you an overview of your projects in The Real Deal. You can add new projects or manage your existing projects within the three different categories: Go on an excursion, Have a party or Starting a charity. Furthermore you are able to watch and approve your pupils' images for the projects.

How to add a new project

Step 1

Give it an appropriate title. Your pupils will be able to change the title into their own choice, when they start working on the project.

Step 2

Set up a project by choosing one of the options: Go on an excursion, Have a party or Starting a charity.

Step 3

Assign the project to one of your classes/group within a class, by writing the class name(s)

Step 4

Allocate pupils to your project by writing their names in the box *members of this project*.

Step 5

Add your project to your project database by clicking the 'save and continue'-button.

Step 6

Remember to tick on the *I have read and agree with Terms of publishing*

You have now created a new project for The Real Deal and edited its details. Now you just need to introduce the challenge to your pupils. Have fun!
